Index

agreement on outcome 10–15
agreement on procedure 15–18
allocation of fractions under proportional representation
  Jefferson's method 267
  Webster's method 266–7
alternative Schwartz rule 232–5
alternative Smith rule 232–5
alternative vote 193–5
Andrae, Carl 270
anonymity
  as a condition for RBVPRs 149–50
  in majority rule 85
approval voting 170–4
Arrow Theorem 123–37
authority as a mode 16, 54, 66–7
Bailey, Martin xiv–xv, 290–92, 295, 298, 300
Bergson, Abram 26–8
Black, Duncan 122 fn, 178, 195, 209, 213–15
Black rule 209–11
Blaug, Mark 23
Borda, Jean-Charles de 176–7
Borda rule 176–81
Bordes, Georges xiii, 142 fn
Buchanan, James 32–3, 36, 70, 73, 142 fn
Bucklin system 203–206
cardinal-weighted pairwise comparisons 235–6
choice consistency
  as a condition for RBVPRs 149, 151
  in the Arrow theorem 126–7, 137–8, 140
Clarke, Edward xiv–xv, 292
collective decision
  definition 5–6
  taxonomy of procedures for 9
collectivity, definition 4–5
combinativity 158, 165–242
Condorcet, Marquis de
  development of Condorcet rule 182
  justification for majority rule 84
  supporter of Condorcet consistency 195
Condorcet consistency 154, 158–9, 163, 165–242
Condorcet rule 102–103, 106, 182–90
consensus 10–11, 52–3, 64
contest as a mode 17–18, 55, 68
Coombs, Clyde 213
Coombs rule 213–15
Copeland rule 206–209
cost of computation
  definition 161
  in rules for continuums of two or more dimensions 247–61
  in rules for discrete options 165–242
criteria for evaluating collective decision procedures
  efficiency 36–7
  equity 37–9
  stability 39–40
cumulative voting 265
de la Vallee Poussin, D. 316
decision
  compared to judgment 6–7
  definition 3–4
demand-revealing process
  multiple discrete options 304–10
  one-dimensional continuums 311–16
  two options 292–302
Dodgson, Charles 195
Dodgson rule 196–9
dominance 153
Dreze, J. 316
Droop, H.R. 270–72
dueling 17–18
Dummett, Michael 268–9, 278–9

ease of use
  definition 161
  in rules for continuums of two or more dimensions 247–61
  in rules for discrete options 165–242
estimated centrality rule 215–17
extortion as a mode 12–13, 54, 66
Gibbard–Satterthwaite theorem 143–8
GOCHA set 154–5
Green, Jerry 144
Green-Armytage, James 235–6
Gregory, J.B. 273
Hare, Thomas 270
Hicks, John 28–31
Hill, David 100, 274, 278
Hill, Roland 269
Hill, Thomas Wright 269–70
homogeneity 157–8, 165–242
independence of clones 159–60, 165–242
independence of irrelevant alternatives
  as a condition for RBVPRs 149–51
  in the Arrow theorem 132–3
invariant loss consistency 155, 165–242
Kaldor, Nicolas 28–31
Kemeny rule 182
knowing
  applied to collective decisions 62–8
  definition 57–61
Laffont, Jean-Jacques 144
Larson, J.A.O. 83–4
lucidity 161, 165–242
majority consistency 153, 165–242
majority rule
  justifications for 84–91
    equal weights 84–8
    unequal weights 88–91
    disinterested judges 88–90
    self-interested advocates 90–91
Malinvaud, E. 317
Mann, Irwin 272
Margolis, Howard 294, 316
material equality 49–50
maximin rule 212–13
May, K.O. 84–6
median voter rule
  in multiple dimensions 248–51
  in one dimension 245–7
Meek, Brian 274–5
minimum sum of distances rule 254–6
minimum sum of forces rule
  multi-stage 259–60
  single stage 256–8
monotonicity
  as a condition for RBVPRs 149–50, 157, 162, 165–242
  connection to Arrow's positive association 132
  in majority rule 87
multidimensional balanced pulls rule
  multi-stage 258–9
  single-stage 251–4
multidimensional continuums 247–61
multiple vote plurality rule 264–5
mutual majority consistency 153, 165–242
Nanson, E.J. 195, 201
Nanson rule 201–203
neutrality
  as a condition for RBVPRs 149–50
  in majority rule 85
non-dictatorship
  as a condition for RBVPRs
  in Arrow theorem 133, 139–40
  in Gibbard–Satterthwaite theorem 143, 148
one-dimensional continuums
  demand-revealing process 311–16
  rules with equally weighted votes 245–7
  Thompson insurance mechanism 311
outcome efficiency 46–8
Pareto, Vilfredo 24–6
Pareto consistency
  as condition for RBVPRs 149–50
  in Arrow theorem 134, 140
  in Gibbard–Satterthwaite theorem 146, 148
  relation to *k*-PSC in STV 269
Pareto improvement
  as criterion for collective decisions 24–6

Pareto improvement (continued)
relation to criterion of stability 39
relation to demand-revealing process 297–9, 310
party-list systems 265–7
perfect-tie responsiveness 157, 165–242
plurality 165–70
Polinsky, Mitchell 31
positive responsiveness
as condition for RBVPRs 149, 151, 156, 158, 162–3, 165–242
in majority rule 85–7
preservation 51–2
procedural efficiency 43–6
productivity-based inequality 50
properties of vote-processing rules, table 236–7
proportionality for solid coalitions 268–9
pseudo-consensus 11–12, 53, 64–5
random process 16–17, 54, 67
range voting 174–6
ranked pairs rule 219– 23
Rawls, John 32–3
RBVPR, defined 137
reciprocity 21
resolvability
as a condition for RBVPRs 149, 151, 156–7, 162, 165–242
in majority rule 87
resistance to strategy
definition 161–2
in rules for continuums of two or more dimensions 247–61
in rules for discrete options 165–242
restoration 50–51
Samuelson, Paul 26–8
Schulze, Markus 228, 230
Schulze method 228–32
Schwartz consistency 154–5, 165–242
Scitovsky, Tibor 30
Senatorial rules 273
simplified Dodgson rule 199–201
single transferable vote 267–79
comparison of versions 276–9
paired comparisons by 279–86
Smith consistency 154, 165–242
social welfare function 27–8
stability 39–40
strategy proofness
as a condition for RBVPRs 149, 151
in the demand-revealing process 292–3
in the Gibbard–Satterthwaite theorem 143–8
supportable vote-processing rules 236, 238–42
symbolic equality 48–9
Thompson, Earl 290–91
Thompson insurance mechanism
multiple discrete options 302–304
one-dimensional continuum 311
two options 291–2
trade as a mode 12, 53–4, 65–6
Tullock, Gordon 32–3, 36, 263, 292
two- or more-dimensional continuums
single-stage rules for 247–58
multi-stage rules for 258–60
two-ballot majority rule 190–93
universal domain
as a condition for RBVPRs 149, 151–3, 162, 165–242
in majority rule 85
Vickrey, William 143
voting
attraction of, in light of the Arrow theorem 140–1
compared to other modes 54–5, 67–8
definition of 17
dimensions of 78–80
elements of 77–78
historical origin of 83–84
voting cycles 93–122
conditions that preclude and promote 95–9
frequency of 99–115
probability tables for 116–122
significance of 115
Warren, C.H.E. 274–5
weighted Condorcet rule 223–7
Young rule 217–18
Zeckhauser, Richard 163 fn, 260
